deserves a decent  
place to call home.

## Real Estate Community Build | 2025

Real estate industry professionals know that homeownership matters to individuals, families, and communities. It matters because it provides a foundation for growth for families and children, and it strengthens communities and our economy. This May, the Real Estate Community Build will bring together businesses and professionals in the real estate industry to construct a Habitat home.

## Building a Strong Foundation for Families

Homeownership, especially affordable homeownership, impacts families and communities for generations. When families are able to purchase a home that they can afford, they are able to invest in their future, grow in their community, and provide a stable foundation for their children as they become adults. The Real Estate Community Build changes lives by creating an affordable homeownership opportunity for a hard-working family.

### Why the Real Estate Community?

We know that real estate professionals are passionate about helping families create homes. By teaming up with other industry professionals, Real Estate Community Build has the power to raise funds, walls, and awareness to change the life of a family through affordable homeownership.

### How does it work?

With the support of their institutions and networks, teams of real estate industry professionals will work alongside a Habitat homebuyer to construct a Habitat home throughout the month of May. When the home is complete, the homebuyer will purchase the home with a 0% interest mortgage giving them a strong foundation for their future.

## Real Estate Community Build Sponsorship
